AquaNaut® 450

SUCTION CLEANER

Total System: Pumps | Filters | Heating | **Cleaners** | Sanitization | Automation | Lighting | Safety | White Goods

CLEANERS

The 4-wheel drive cleaner that's designed to do it all.

Experience the most versatile clean with the AquaNaut® 450 suction cleaner.

AquaNaut 450 features powerful 4-wheel drive performance and is designed for pools up to 16' x 32' and pools with deep ends (can be adapted for larger pools up to 20' x 40'). Engineered with patented V-Flex™ variable vane turbine technology, AquaNaut 450 easily processes larger debris, virtually eliminating clogs while maximizing power at any flow. Multiple pre-programmed internal steering sequences ensure equal coverage of deep and shallow ends, including walls. For a rugged, reliable clean in pools of all shapes and sizes, choose the AquaNaut 450 from Hayward.®

V-Flex technology virtually eliminates clogs. As the turbine rotates, the variable vanes flex downward, allowing larger debris to pass easily.

Handles larger debris without clogging.

The patented self-adjusting variable vanes of AquaNaut's V-Flex technology provide maximum power at almost any flow (perfect for use with variable-speed pumps) while virtually eliminating clogs. By adjusting automatically, the turbine vanes allow large debris to pass easily through the cleaner, resulting in complete peace of mind.

Does more with 4-wheel drive.

AquaNaut's 4-wheel drive capability allows it to quickly and completely clean standard-sized pools (up to 16' x 32') and even

pools with deep ends. With help from your pool professional, it can also be adapted for pools up to 20' x 40' (upgrade kit sold separately).

Expertly navigates any surface.

Patented robust tire treads provide superior climbing power on any surface and easy navigation of obstacles such as main drains.

Maintains constant suction.

AquaNaut's patented adjustable roller skirt ensures it never loses suction on uneven surfaces or obstacles.

Optimal suction at almost any flow.

Three easily interchangeable throats improve suction performance at lower flow and allow larger debris to pass. AquaNaut is the ideal partner for use with variable-speed pumps.

1

Small throat

For better suction with lower flow rate and smaller pump; can be used with variable-speed pump at lower speeds.

2

Medium throat (default throat)

For almost all average pool filtration systems and installations.

3

Large throat

For better suction with higher flow rate and larger pump; can be used with variable-speed pump at higher speeds.

EXPERT LINE

AVAILABLE MODELS

AquaNaut® 450

4-Wheel Drive Suction Cleaner

PBS42CST

FEATURE

AQUANAUT 450

Pool Size

All shapes and depths up to 16' x 32'; adaptable for pool sizes up to 20' x 40' with optional kit sold separately*

Hose Length

40'

Pool Surface

Concrete, Gunite, Vinyl, Fiberglass,**
Tile,** Pebble

Minimum Pump Size

1/2 HP or 35 gpm

Drive Sequence

Turn every 8' to 10'; adaptable to every 11' to 14' with optional kit sold separately*

Warranty

2 years

**In order for AquaNaut 450 to effectively clean a pool larger than 16' x 32' pool, it must be retrofitted by a pool professional with a larger cam (sold separately).*

***Optional tape tires may be required for smoother surfaces.*
