

WHEN TO DO IT	WHAT TO DO
Start Up	<ul style="list-style-type: none"> • Balance pH and Alkalinity • Put in vanishing act hardness pillow for 24 hrs • Flip it at the 12 hour mark • Add 100% of the recommended salt for your hot tub (as per the Ace Owner's Manual) • Shock the hot tub with 5 Tbsp of Energize (do this every day until a chlorine level is maintained) • Set use level to 8 • Scale this back to 6 when you maintain a chlorine level
After Each Use	<ul style="list-style-type: none"> • 1 Tbsp of Energize after each use
Weekly	<ul style="list-style-type: none"> • Test the water and balance according to your test strips • Adjust use level based on bather load
Every 2 - 3 Weeks	<ul style="list-style-type: none"> • Remove filter cartridges and clean with a hose or a cartridge cleaner solution
Every 6 Months	<ul style="list-style-type: none"> • Drain and refill the hot tub

IDEAL RANGES

Bromine	1-5ppm
Alkalinity	80-120ppm
Salt	1500-1800ppm
pH	7.2-7.6
Calcium	25-75 ppm
Phosphates	0 ppb

Please Note:

The use level of the tub will be bather load dependent. The more people and longer the hot tub is in use, the higher the use level will be.

All chemicals should be poured near the filters for even distribution, with the jets on high, or by activating a clean cycle. All air jets should be turned off.

Always wait 30 minutes to use the hot tub after applying chemical treatments. A longer wait may be required if pH Down has been added.
